Topics include sessions on

➢ What is new in MDT based interventions
  i. How to enhance your skills at identifying the needs of patient and carers
  ii. How to improve your informal interventions – in the clinic and on the ward
  iii. What nurse-based interventions strategies are available
  iv. When to use formal clinical psychological intervention.

➢ HRQOL information
  i. What information do patient, carers, the MDT and referring practitioners want
  ii. How can we best meet the information needs
  iii. Does the quality and timing of information make a difference

➢ HRQOL in clinical practice (lessons learnt since the last workshop)

➢ Free paper session

On the Wednesday afternoon pre-workshop there will be a session on the practical issues of patient self-completed questionnaires: A beginners guide to when, how and what outcomes

Course fee - £190 for medics £140 for allied health professionals & nurses
