Edge Hill University

"What will I be like following head and neck cancer?"

2. Early stage throat cancer treated by surgery (not radiotherapy)

Number of patients giving feedback is 74 out of a total of 108

Patient responses closest to two years following diagnosis as this reflects long term outcome

Percentage of patients scoring on the best two responses for each domain

Activity - I am as active as I have ever been/There are times when I can't keep up my old pace, but not often

Appearance - There is no change in my appearance/The change in my appearance is minor

Anxiety - I am not anxious about my cancer/I am a little anxious about my cancer

Chewing - I can chew as well as ever/I can eat soft solids but cannot chew some food

Mood - My mood is excellent and unaffected by my cancer/My mood is generally good and only occasionally affected

Pain - I have no pain/There is mild pain not needing medication

Recreation - There are no limitations to recreation / There are a few things I can't do but I still get out and enjoy life

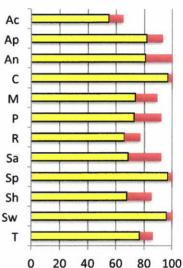

Saliva - My saliva is of normal consistency/I have less saliva than normal, but it is enough

Speech - My speech is the same as always/I have difficulty saying some words but I can be understood over the phone

Shoulder - I have no problem with my shoulder/My shoulder is stiff but it has not affected my activity or strength

Swallowing - I can swallow as well as ever/I cannot swallow certain solid foods

Taste - I can taste food normally/I can taste most foods normally

Yellow show percentage with top 2 responses. Red show percentage with 'significant' problem.
